1 Stepping is cool

1.1 Basic stepping

! To enable/disable stepping please enable/disable the mode 'screen' !

STEP ONE.

Step.Substep : .

Page.SubPage : 1.a

STEP Two. Note that the automatic increment of \pagenumber is stopped during stepping (see \setuppagenumber[state=stop] in the module). Instead of incrementing \pagenumber, a \subpagenumber (here shown in characters) is used, which gets resetted by subsection.

Step.Substep : .
